

How to change my Camera Password via phone APP

- 1 . Please make sure you connect this camera asuccessfully.

2. Click "Change Password"

3. Input the old password and new new password.

The screenshot shows a mobile application interface for changing a password. At the top, the status bar displays the time 16:24, 4G signal, and battery level. The app header includes a blue back arrow and the text 'Change password'. Below the header are three input fields: 'Old Password', 'New Password', and 'Confirm Password'. Each field contains masked characters (dots). To the right of each field is a text box with an arrow pointing to it, providing instructions: 'Default password : admin' for the Old Password field, 'The password you want to change (max:31 characters)' for the New Password field, and 'Repeat the password' for the Confirm Password field. Below the input fields is a toggle switch labeled 'Show password' which is currently turned off. At the bottom of the form is a large blue button labeled 'Apply', with an arrow pointing to it from a text box that says 'Click "Apply" to save the setting'. A large, semi-transparent 'BOUNVISION' watermark is visible across the center of the screen.

16:24 4G

< Back Change password

Old Password Default password : admin

New Password The password you want to change (max:31 characters)

Confirm Password Repeat the password

☐ Show password

Apply Click "Apply" to save the setting
