

### **How to change the resolution?**

This camera has different resolutions, you can choose by yourselves.

1.If you monitor it via app, they can change the resolution "SD"or "HD".

2.If you monitor it via "HiP2P" software, you can enter the "Parameter Setting" to change the stream type. Choose "main stream" and the resolution.

Actually, it will be the best quality videos if you download the recordings, you can download recordings to check.

But it need to adapt your Internet signal to get the best view speed when you view it directly without download.
